Unit Skylights

enlighten your world

SKYLINE SKY-LITES DELIVER QUALITY AND PERFORMANCE

With imaginative design, the use of Sky-Lites can be a dramatic addition to any room. A feeling of spaciousness and freedom will result from an open view to the sky above. Brightening your home with Skyline Sky-Lites and the invigorating rays of the sun can enhance the quality of your family's life and raise the value of your home.

Since 1973, Skyline Sky-Lites has manufactured a complete line of skylights, monumental glass structures, and sloped glazing systems. We are capable of providing anything from a small dome skylight through a fifty-foot free-spanning glass structure. With many impressive references throughout the country, we have earned ourselves the reputation of an industry leader.

Skyline combines its own innovations with the latest technology to assure every product we manufacture meets our unparalleled commitment to quality. Our meticulous craftsmanship and innovative product engineering ensure

that each Sky-Lite we manufacture meets every technical requirement for both performance and longevity. Only the highest quality materials become a part of our products.

All Skyline Sky-Lites are manufactured to support a 40 psf combined load. For greater loading requirements, please contact the factory. No warranty is made or implied that Skyline Sky-Lites are suitable to resist human impact and appropriate safety devices should be considered where this is a consideration.

Our sales and technical staff are eager to serve you with design assistance, advice, and pricing for the appropriate product to match your day-lighting requirements.

Visit us at **www.skylites.com**
to learn more about our skylights and to
download the appropriate details and
specifications for your project.

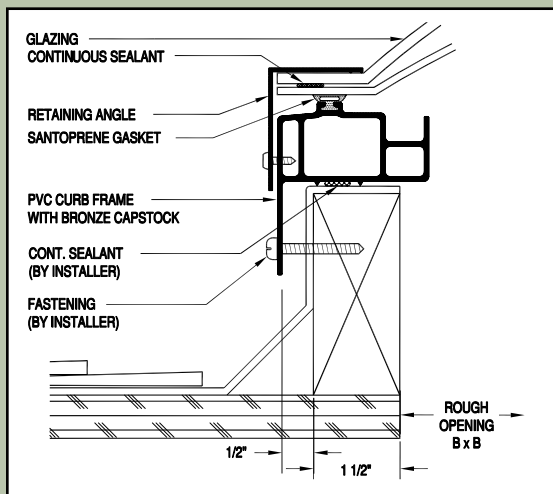

Skyline's wide variety of sizes and shapes in unit skylights can find an application in any type of construction—commercial, industrial, or residential.

Space does not allow us to show all the configurations of glazings, shapes and models. Please call the factory or visit www.skylites.com for complete information.

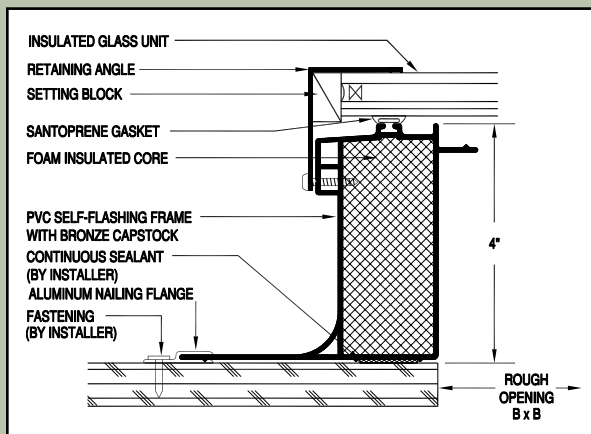

- **PVC Bronze Frame**
- **Bronze Anodized Aluminum Retainer**
- **Superior Insulation**
- **Virtually No Thermal Conductivity**
- **Available in Dome, Pyramid or Flat Glass**

Curb Mounted

Self-Flashing

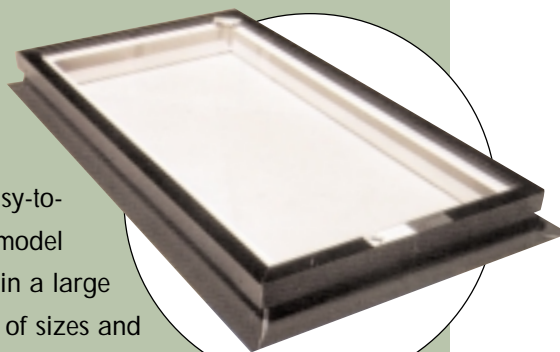

YCM CURB-MOUNT

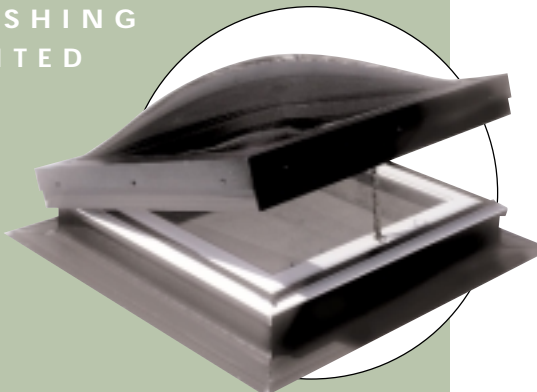

Our most popular curb-mount model is available in a wide range of sizes and glazings.

YSF SELF-FLASHING

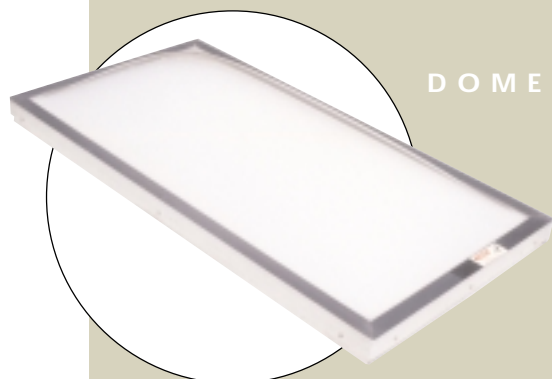

This easy-to-install model comes in a large variety of sizes and glazings.

VEN YSF SELF-FLASHING VENTED

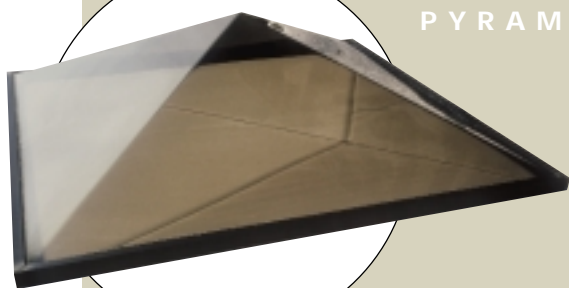

These aluminum-framed Sky-Lites have been the standard for the industry for many years. Gaskets between the glazing and frame provide a tight seal while weep holes carry excess moisture to the exterior. This popular Sky-Lite model is available

in dome, pyramid, flat Low E glass or extended pyramid, all with single, double or triple glazing. Standard glazing colors are clear, white or bronze. Standard frame finishes are natural aluminum, bronze or clear anodized.

Thermally Broken Curb-Mount

Thermally Broken Insulated Curb

Aluminum Insulated Curb

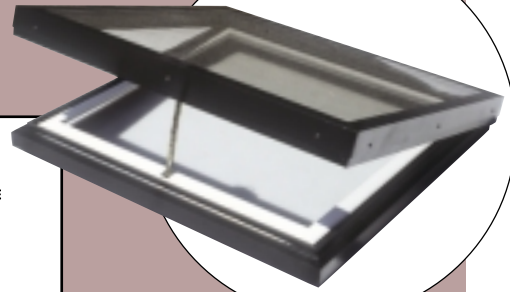

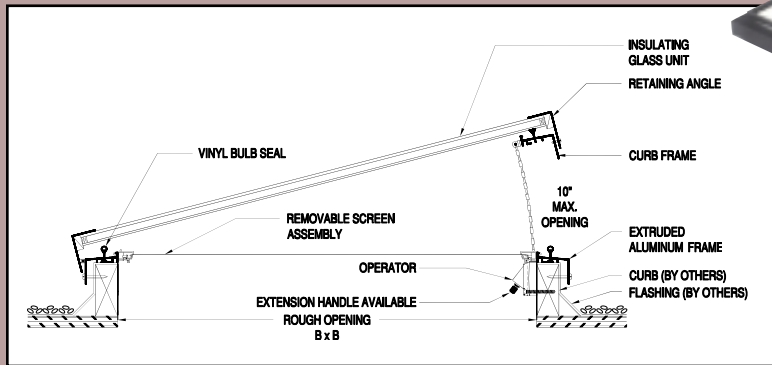

Aluminum-framed vented Sky-Lites are available in standard and thermally broken frames and may be operated manually or electrically. They are offered in dome, pyramid and flat glass, in clear, white

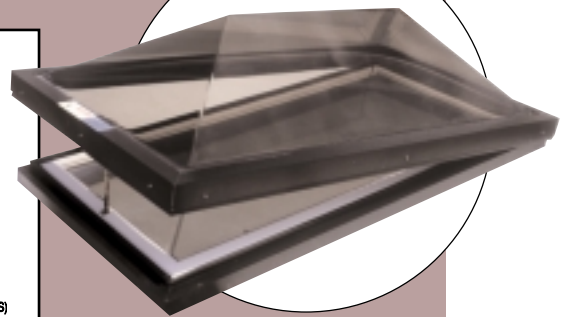

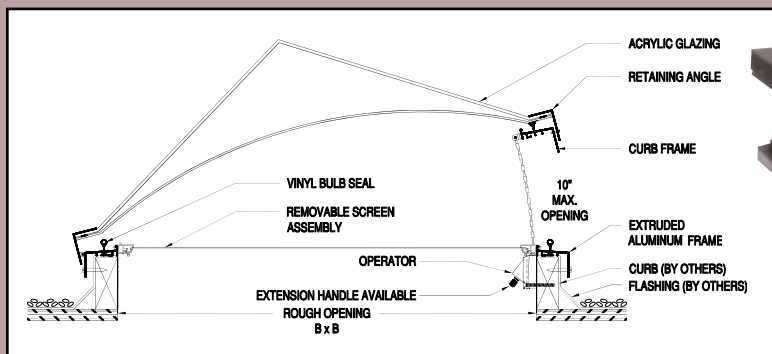

or bronze glazing colors. The hatchway Sky-Lites are offered in acrylic domes and pyramids only. Please call or visit www.skylites.com for more information.

These products are available in most standard sizes.

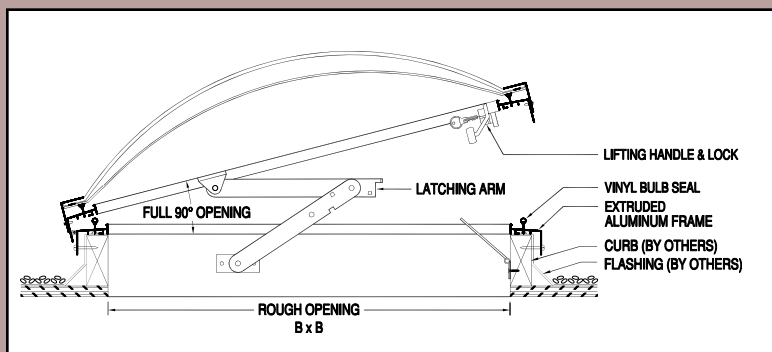

VENTED FLAT GLASS

VENTED PYRAMID

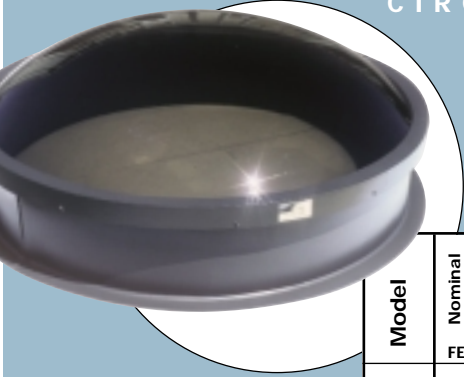

HATCHWAY

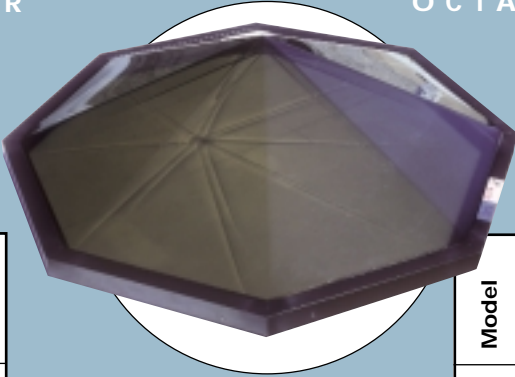

Skyline offers Circular and Octagon Sky-Lites in standard sizes up to a full eight feet in diameter. But we don't stop there. Chances are, if you can envision it, we can build it. So

let your imagination run wild and contact us with your exact specification for custom shapes and sizes.

Model	Nominal Sizes FEET	Rough Opening Diameter INCHES
48	4'	43"
60	5'	54"
72	6'	67"
96	8'	91"

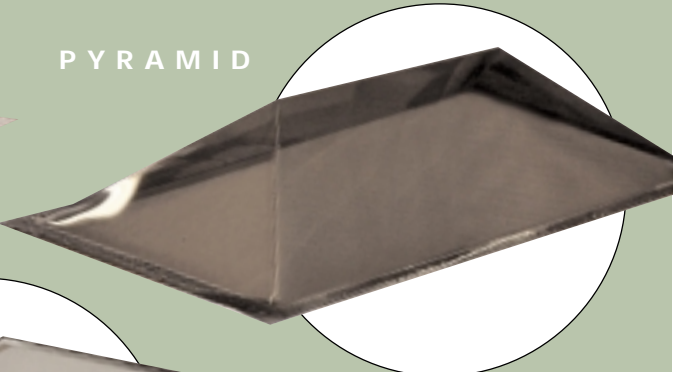

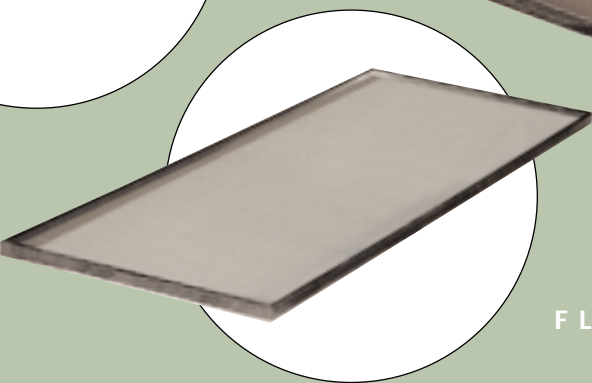

Model	Nominal Sizes FEET	Rough Opening Diameter INCHES
28	2'	22½"
52	4'	46½"
76	6'	69¾"
98	8'	92¾"

Skyline supplies standard and custom replacement glazings for all skylights, regardless of the original manufacturer. Replacing broken or defective glazings is often a simpler and more cost effective solution than replacing an entire

skylight. Glazing replacement does not require the removal or replacement of roofing materials or flashings. Download our replacement glazing worksheets at www.skylites.com or call us with your exact specifications.

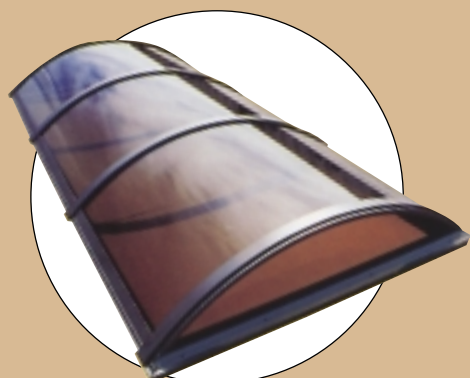

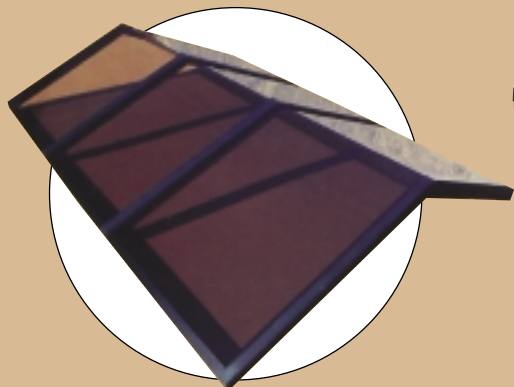

Skyline's continuous vault, ridge, pyramid and tandem skylights offer the designer an opportunity to include dramatic skylighting in a very cost effective manner. Continuous

skylights are available in both standard and custom widths in any length. Visit www.skylites.com for standard width dimensions and configurations.
